- ✓ OSHA only allows trained workers to operate aerial lifts.
- ✓ Helps keep workers safe and companies compliant.
- ✓ Training applies to all industries using aerial lifts or MEWPs.
- ✓ Courses stay updated with current OSHA rules.

Why OSHA Aerial Lift Training Is Needed

OSHA rules are designed to keep workplaces safe.

Proper training lowers the risk of accidents and injuries.

Trained workers are less likely to get hurt or cause damage.

Untrained aerial lift operators increase the risk of serious injuries or death.

OSHA can issue large fines if operators are not properly trained.

How We Help You Stay Compliant

Provides OSHA-compliant aerial lift training for \$75.

Covers all key OSHA aerial lift safety requirements.

Helps protect your company during OSHA audits or inspections.

Ensures operators and workplaces stay safe and compliant.

Staying Current with ANSI Aerial Lift Standards

ANSI standards work alongside OSHA rules.

Key updates include:

ANSI A92.22 – Safe use of MEWPs ANSI A92.24 – Training requirements for MEWPs

These standards focus on:

Proper maintenance

Safe equipment use

Risk assessment and safety planning

Why ANSI Updates Matter

Help prevent worker injuries and accidents.

Reduce job delays, equipment damage, and downtime.

Teach operators how to safely use and maintain equipment.

CertifyMeOnline.net training includes the latest ANSI updates.

Courses are updated to match current OSHA and ANSI safety rules.
