Are Scissor Lifts Scaffolding or Aerial Lifts?

OSHA considers scissor lifts both scaffolding and aerial lifts.

Training rules list them under scaffolding.

Because they lift workers, they are also treated as mechanized scaffolding.

This means proper OSHA training is required before use.

Scissor Lift Certification with CertifyMeOnline (CMO)

CMO offers OSHA-compliant scissor lift training.

Aerial Lift Trainer certification covers all scissor lifts.

Training gives workers the skills and confidence to operate safely.

The course costs \$75 and helps your company stay compliant.

Scissor Lift Certification Online — Key Benefits

✓ 100% online training

✓ OSHA-compliant certification

✓ Affordable pricing

✓ Free 3-year renewal training

✓ Excellent customer support

✓ Courses available in Spanish

Why Choose CMO

✓ Flexible training that fits your schedule

✓ No work stoppages due to expired certifications

✓ Easy, affordable way to meet OSHA requirements

Scissor Lift Training & Certification Cost

Key points

Online training costs less than \$100 with CMO.

Includes tools to train and certify operators in-house.

Cheaper than offsite or third-party classroom training.

Extra courses available, such as Fall Protection, HAZMAT, and Train the Trainer.

No travel costs or lost work time.

OSHA Scissor Lift Training Requirements

Scaffolding accidents are among OSHA's top 10 violations each year.

Employers must provide OSHA-compliant instruction and documentation.

CMO's Aerial Lift Trainer course covers all scissor lift types and OSHA rules.

OSHA standard 1926.21 requires employers to train scissor lift operators.

Missing training records after an accident can lead to fines over \$100,000.

The Role of a Scissor Lift Operator

Trained scissor lift operators must be able to:

Move the lift safely to the work area.

Raise and lower the platform safely.

Watch for overhead hazards and nearby workers.

Use fall protection when required.

Follow the equipment's load limits.

Why Choose CMO

100% OSHA-compliant training.

Online learning with on-site evaluations.

Affordable, fast, and easy to manage.
