

How Online Cherry Picker Certification Works

Sign up and create an account for your company and employees.

Choose the cherry picker certification course.

Complete the 100% online training anytime, day or night.

Pass the online written test (retries allowed).

Complete a hands-on evaluation by a certified trainer.

After all steps, the operator becomes OSHA compliant.

Cherry Picker Certification Requirements

- ✓ Only trained and certified employees may operate a cherry picker.
- ✓ Training must include:
 - | Safe operation and load limits
 - | Electrical, fall, and falling-object hazards
 - | How to spot and avoid unsafe conditions
 - | A hands-on skills evaluation

Why Choose CertifyMeOnline.net

- ✓ Operators must complete formal training before using an aerial lift.
- ✓ Training includes safety lessons, evaluations, and documentation.
- ✓ A certified trainer must perform the evaluation.
- ✓ A Train-the-Trainer course allows companies to certify an in-house evaluator.

When Refresher Training Is Required

- ✓ Aerial and boom lift certifications expire every 3 years.
- ✓ Employees must complete renewal training to stay certified.
- ✓ For renewal, workers may skip the class if they are confident in their skills.
- ✓ A certified trainer must still complete the evaluation.

Benefits of Getting Cherry Picker Certification

- ✓ Fewer accidents | Training helps prevent injuries caused by improper equipment use.
- ✓ Improved productivity | Certified operators know how to use cherry pickers correctly and safely.
- ✓ Flexible training | Safer workers work more efficiently with fewer interruptions.
- ✓ Instant proof of certification | Trained employees know how to inspect and operate cherry pickers properly.
- ✓ Lower training costs | 100% online courses mean no travel, no classrooms, and less downtime.
- ✓ Flexible training | Employees can train at home, on breaks, or at work—anytime online.
- ✓ Instant proof of certification | Certification cards can be printed right after passing—no waiting for mail.
